EDUCATION

Dwarkadas J. Sanghvi College of Engineering

Bachelor of Technology in Artificial Intelligence & Machine Learning, CGPA: 9.05/10.0

- Relevant Coursework: Computer Networks, Operating Systems, DBMS, Data Structures

Mumbai, India

Aug 2023 – June 2027

Mithibai College

MHT-CET: 96.87 percentile

Mumbai, India

Aug 2021 – May 2023

EXPERIENCE

ARCON

June 2026 – Present

DevOps Intern

On-site

- Engineered a distributed **Windows server & process monitoring suite** to provide real-time visibility into process and resource health across the server fleet, collecting telemetry every **30s** with **TimescaleDB** analytics, automated alerts, heap profiling, process controls and **WinRM** self-healing.
- Engineered a **Jenkins multi-environment build pipeline** consolidating **48 individual pipelines (4 environments × 12 projects)** into a single job, introducing parallel batched UI builds that reduced build time from **36 to 12 minutes (67%)**.

RAI Tracker Ltd.

Apr 2026 – June 2026

Machine Learning Systems Intern

Remote

- Developed an **LLM evaluation pipeline** to assess models across **12 Responsible AI dimensions**, including reliability and accountability, using **Azure OpenAI APIs** for systematic model testing and evaluation.
- Built the operational backbone of a **RAG chatbot** by containerizing PostgreSQL, ChromaDB, Arize Phoenix, and Prometheus with Docker; implemented **Prometheus instrumentation** and **Grafana dashboards** for pipeline latency, agent performance, token usage, retrieval metrics, and service health.

PROJECTS

ChromaGen – AI-Powered Color Palette Generator | Next.js, TypeScript, Flask, Groq, LangChain, PostgreSQL

- Built an **AI-powered color generation platform** using **Groq LLaMA 3.3 70B** and **LangChain** to generate and iteratively refine harmonious 5-color palettes from natural-language prompts.
- Implemented an **image-to-palette pipeline** using **Pillow** and **K-Means clustering**, extracting the **5 dominant colors** from uploaded images up to 10MB.
- Developed a full-stack architecture with **Next.js**, **Flask REST APIs** and **PostgreSQL**, adding **OAuth authentication**, **WCAG accessibility analysis**, **color-blindness simulation**, and deployed services on **Vercel + Render**.

ShipStack – Distributed Build & Deployment Engine | React.js, Express, AWS (S3, SQS FIFO, DynamoDB), Docker

- Architected an **event-driven deployment service** using **AWS SQS (FIFO)** for job orchestration and **DynamoDB** for distributed state tracking.
- Designed a build system where repositories stored in **S3** are processed asynchronously by worker services and deployed as production-ready artifacts.
- Containerized services using **Docker** and automated build orchestration through queue-based CI/CD-style execution.

TECHNICAL SKILLS

Languages: Python, C++, C, Java, JavaScript, TypeScript

Frameworks: React, Next.js, React Native, Express, Node.js, Flask, FastAPI

Cloud & DevOps: AWS (S3, SQS, DynamoDB), Docker, Jenkins, Prometheus, Grafana, PowerShell, WinRM

Databases & Tools: MongoDB, PostgreSQL, MySQL, MSSQL, Git, GitHub, Postman, Vercel

ACHIEVEMENTS

- 2nd Runner-up – Codeshastra 12** – Dwarkadas J. Sanghvi College of Engineering
- 2nd Runner-up – Frontend Arena** – Rajiv Gandhi Institute of Technology

EXTRACURRICULARS

Tech Web-Dev Head , Co-Founder - CodeAI

Mumbai, India

Founded **DJS CodeAI**, **DJSCE AI club**

June 2025 – June 2026

- Led and managed a 10-member technical team; built the official club website (djscodeai.in) and mentor-mentee portal (portal.djscodeai.in), handling end-to-end development, deployment, and **SEO optimization**.
- Organized the flagship event **CodeVerse** (codeverse.djscodeai.in).
